

GREEN DESIGN

What is “Green Design?”

Design and construction practices that significantly reduce or eliminate the negative impacts of buildings on the environment and occupants that address:

- Sustainable site planning
- Safeguarding water and water efficiency
- Energy efficiency
- Conservation of materials and resources
- Indoor environmental quality

Central Concrete Supply made a commitment to the “sustainable” or “Green Design” movement five years ago and has continued to be on the leading edge of concrete technology, practice, and education for the Construction Industry.

Central Concrete Supply has a full time staff dedicated to working with Design Teams to maximize their efforts to incorporate the many benefits of concrete into their designs. We take great pride in bringing our many years of knowledge and experience to the design process.

Central Concrete Supply has developed and continues to improve on products for sustainable design.

These include :

- Pervious concrete for storm water management.
- High cement replacement concrete incorporating Fly Ash and Blast Furnace Slag.
- The Caltite Waterproof Concrete System for replacement of membranes and for use in green roof design.
- ICF forms for highly energy efficient wall systems.
