

QUIKRETE Repair

CONCRETE PRODUCTS

Concrete Repair A weather-resistant, tough, flexible crack-filler, and sealer. Helps prevent water and ice damage to masonry surfaces. Dries to a texture finish to blend with surface. Apply with standard caulking gun.

Use for:

- Repairing cracks in concrete, masonry and stucco
- Ideal for vertical surfaces

Lbs.
10 oz. tubes

Mortar Repair Use in standard caulking gun. Square applicator tip is designed to mortar joints.

Use for:

- Tuck-pointing and sealing mortar joints in brick or block surfaces
- Cracks in concrete and block walls

Lbs.
10 oz. tubes

Concrete Bonding Adhesive Penetrating pores of old concrete, forming a chemical bond for new concrete overlay 1" or thicker. Apply directly to concrete surface.

Use for:

- Bonding new concrete to old concrete.

Lbs.
1 qt. bottle
1 gal

Concrete Acrylic Fortifier A water-resistant acrylic resin admixture for Portland cement-based repair and patching products. Provides increased bond strength when mixed with QUIKRETE sand mix, QUIKWALL SBC and other QUIKRETE repair products.

Use for:

- Applications requiring increased bond strength and improved resistance to water penetration.

Lbs.
1 gal. bottle
