CONCRETE PRODUCTS

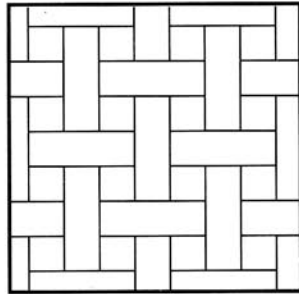

LITHOTEX PAVECRAFTERS

Manipulating light and shadow to create pedestrian and vehicular traffic areas that are attractive and unique, LITHOTEX Pavecrafters are a system of pattern-matched tools for texturing the surface of freshly placed architectural concrete flat work. Combining the look of natural paving materials with the structural strength of concrete, Pavecrafters tools can accurately duplicate virtually any texture, whether designed by nature or imagined by man.

SELECTED PATTERNS T-402.01

STONE TILE
P312 Stacked Bond
Request Pattern Sheet D-312
