

Hancor

NEW ECOFIRST® PIPE

ENHANCED PERFORMANCE WITH THE ENVIRONMENTAL DIFFERENCE

With over a century of experience, we're experts when it comes to providing innovative solutions for all kinds of drainage applications. Now, a patent pending process enables Hancor to offer the only HDPE drainage pipe engineered from recycled resin that's capable of meeting AASHTO M294 Type S requirements.

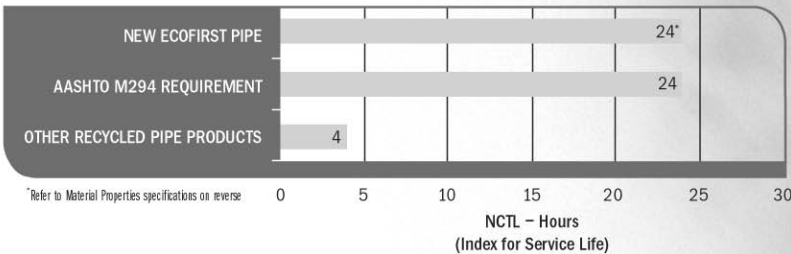

This new technology means EcoFirst can meet higher NCTL standards while meeting all AASHTO performance levels. EcoFirst delivers the ideal environmental solution without compromising performance service life.

Now, with government agencies and organizational bodies such as the US Green Building Council increasingly mandating greater use of "Green" building practices, EcoFirst also offers an important financial benefit. Under the Leadership in Energy & Environmental Design (LEED) Green Building Rating System program, EcoFirst can aid architects and developers in obtaining LEED Certification Credits for recycled building materials.

5 YEAR WARRANTY

EcoFirst, engineered with Hancor's patent pending technology is backed by an industry exclusive 5 year limited warranty.

STRESS CRACK RESISTANCE (Slow Crack Growth)

A percentage of Hancor's EcoFirst sales supports Ducks Unlimited conservation efforts.

Hancor Service: Hancor representatives and engineers are committed to providing you with the answers to all your questions, including specifications, installation, backfill recommendations and more.

FEATURES

- Environmentally friendly manufacturing process using recycled polyethylene.
- Increases compliance with EPA Phase II Best Management Practices.
- EcoFirst can aid in qualifying for LEED Certification Credits.
- Rolled Rim Bell.
- HS-25 (Highway traffic loads) rated with a minimum of 12" (0.3m) of cover.
- HDPE pipe provides superior resistance to chemicals, road salts, motor oil and gasoline.
- Withstands repeated freeze/thaw cycles and continuous sub-zero temperatures.
- Silt-tight rubber gasket and joint available.

BENEFITS

- 5 year limited warranty for superior value.
- LEED designation contributes to lower interest rate for borrowing where applicable.
- Hassle free connections.
- Lightweight, high strength composite system requires less labor time for faster installations and reduced costs.
- Fast bell-and-spigot joint assembly with unsurpassed structural integrity.
- Available in 20' (6m), 30' (9m) and 9'4" (2.8m).
- Superior hydraulics/smooth interior minimizes debris and sediment build-up.
