

Dear Valued Customer,

January 1st, 2005

It was well over 50 years ago that the founders of the "new" Central Concrete Supply Co. started to provide concrete and building materials to customers, that were building the future landmarks of the Bay Area. Projects such as: Lexington Dam, Moffet Field, San Francisco Airport, San Jose Airport, San Jose Hospital, major B.A.R.T. Stations & Tunnels in the East & West Bay Area, major Cal Trans Interchanges all over Northern California, and the San Jose Water Treatment Plant are all examples of just a few of the landmarks that are still in service today. Since these early days, tremendous progress and growth has been made in all areas. Increased market coverage, due to our expansion in Northern California, includes 16 batch plants and 6 Westside locations. Additionally, we are proud of our product promotion seminars, "How To" programs, and our exclusive "Concrete Technology Forums," that help educate our concrete contractors and the structural engineering community. These programs are all designed to be on the leading edge of product promotion and technology! We believe that this activity will sustain industry growth and, therefore, benefit Central Concrete.

We are proud to provide to you this catalog of products, but more importantly we have the product knowledge that helps implement the correct usage of our product line.

In June 1999, we became part of the U.S. Concrete family, which operates in several other parts of the United States. With this association, it makes us a big part of the 5th largest concrete producer in the U.S. and gives us tremendous access to professional assistance in concrete technology, marketing, and financial stability - thereby insuring that our family of Central Concrete Supply Co, Westside Concrete Materials, and Central Precast Products, Inc. will be around for the next generation, and generations to come. We will always be your "Leading Edge Supplier" of Ready Mix Concrete and related building materials, so that you may continue building, tomorrow's landmarks!

Serving our customers with pride,
