

## ADS Drainage Systems

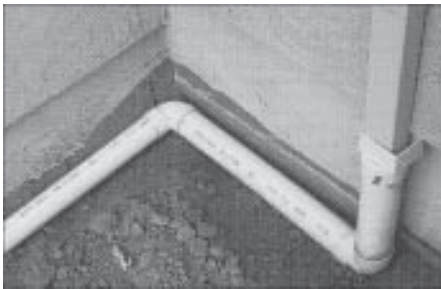

**Unique Manufacturing Technology** Smooth inner wall, Corrugated, structural core, and Smooth outer wall. Three bonded polyethylene layers for exceptional pipe stiffness. A smooth inner wall is co-extruded with a corrugated structural core, which is then extrusion laminated with a smooth white outer wall. This construction gives the pipe an unprecedented strength-to-weight ratio, and stiffness ratings at least double that of any competitive sewer and drain pipe.

**Injection molded high density poly-ethylene coupling is spun welded to the pipe.**

- Consistent dimensions and tolerances
- Deep tapered bell ensures tight fit
- Pipe will fit any standard Sewer & Drain fitting (PVC, Styrene, etc.)

### Drainage Pipe:

Part#	Size.	Feet	Style	O.D.
465-0010	4"	10'	solid	4.215
365-0010	3"	10'	solid	3.250

### Residential Drainage

- Down pour runoff
- Sump pump outlet
- Foundation/footer drainage
- Curtain drains

## Bags & Barrels Burlap Bags

**Burlap bags** are rugged containers that come in several sizes and weights. 7 oz. burlap is lightweight and good for general-purpose applications. 10 oz. burlap is a tighter weave and more durable. 12 oz. burlap bags are very durable and will hold up to the most demanding applications.

Used burlap bags offer the same benefits at a reduced price. Sold in bales of 500 or in bundles of 50 (minimum order of 50).

### Burline (burlap materia)

Size.
1000' Bale

### Burlap Bags:

Size.
25lbs (1000 per bale (18x30))
50lbs (1000 per bale (17x27))
