

Hand Tools

Cement Finishing Brushes

These brushes are made of fibers which are as fine as camel hair but contain the desirable qualities of synthetic fibers. They will not mildew, mold, bunch or separate. The fibers do not hold water thus allowing the user to brush the concrete surface acquiring an even brushed surface without having to wait for the concrete to dry out! The brush is lightweight and easy to handle. After use, rinse and shake dry and the brush is ready for use again. All brooms furnished with bracket, nuts, bolts and washers. Aluminum Back.

Size 24", 36" and 48"

Cement Finishing Brushes

7/8"x21/4"x18" streamlined, lightweight, hardwood block, clear lacquer finish, one threaded handle hole. Heavy fill, staple set, of durable resilient black Durene plastic bristle, 2 rows, 21/4" trim, for grain finish on cement surfaces, also used to spread seal or finish coat on black top surfaces. Handle not included. 5' Luma-thread or No. 2001NP recommended

Size 18", 24", 36" and 48"

Round Wire Broom

Tempered carbon steel. Hardwood block. Stiff wires will push heavy sweepings and remove accumulations adhering to rough surfaces. Great for exposed concrete.

| Block Size | Rows Wide | Trim | Sweep of Broom |
|----------------------------|-----------|-------|----------------|
| 14" x 21/2" | 6 | 31/2" | 15" |
| (Exposed Aggregated Brush) | | | 18" |

"Non-Sparking" Aluminum Frame Floor Squeegees Straight Style

Rugged heavy duty floor squeegee with all aluminum construction. Polished die-cast aluminum handle socket for standard taper handles. 1"x1" x 1/8" special alloy extruded aluminum angle, 1/4" x 2" high quality rubber blade. 3/4" x 9/16" back up angle fitted with captive nuts to facilitate changing rubber blade. All parts replaceable. Use 2003T-5' handle.

| Size | Lbs. |
|------|---------|
| 24" | 18 lbs. |
| 30" | 22 lbs. |
| 36" | 26 lbs. |
