

Multiquip

Forward Plate

These compactors are recognized as the industry standard for top performance, easy handling, low maintenance, and long life. Perfect for use on granular soils and asphalt.

Reversible Plate

Gain the advantages of reversing at full RPM while tackling heavy-duty compaction jobs. Contractors get both flexibility and optimum performance for larger scale compaction jobs. Rugged overall construction is combined with an advanced hydraulic-reversing mechanism for unparalleled durability and results. Perfect for compacting granular soils and asphalt.

DuoScreed

No need to change blades when switching from forms to wet screeding! A unique reversible blade from durable extruded-aluminum alloy. Operators find that this highly maneuverable and functional screed also produces excellent results, with a vibratory system that embeds aggregate and reduces air voids to create a strong, solid slab.
