

The C & H Screed Pad Assembly is very practical and economical. It is used for screeding on concrete surfaces, metal, and wood decking. It can be secured by means of adhesive, grout, nails, etc.

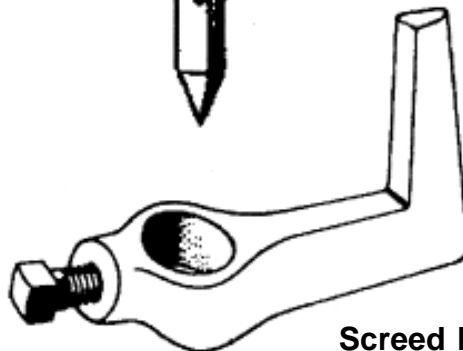

Both the C & H Economy Stake (hot rolled steel) and the C & H Premium Stake (cold rolled steel) feature:

- Three (3) staged nail holes on 1" center, permit nailing to form lumber at any point.
- Properly designed short points which drive easier and faster for positive anchoring in any soil or sub-grade conditions.
- Premium Stakes available in any length.
- Economy Stakes available in lengths up to 48" only.
