

Keson Paint Applicator & Measuring wheel

The Keson Roadrunner makes measuring and marking as easy as taking a walk. Simply set the counter to zero and start walking. One person rolling a Roadrunner can measure faster than two people with a tape measure, and you're not limited to the length of a tape measure.

As long as you walk... you're measuring; up to 999 feet and 11 inches without resetting to zero. The paint applicator saves you from bending over to spray. The applicator is made of tough injection molded A.B.S. plastic with chrome plated metal handle. (The applicator is for use only with spray cans with an inverted spray tip.)

- Accurately measures curved, vertical & horizontal surfaces
- Maximum durability
- 2 Sided printing
- 2 Color blade
- Ideal for all home projects
