

Keson Roadrunner Measuring wheel

Superior Performance Design & Quality

Measuring is quick & easy with all Roadrunner Measuring Wheels. Simply set the counter to zero and start walking. One person can measure faster than two can with a tape measure, and you are not limited to the length of the tape. As long as you are walking, you are measuring. Plus, it's easy to measure curved, horizontal and vertical surfaces. All wheels are specifically calibrated to the counter. Roadrunner Wheels are warranted in writing for materials and workmanship.

Note: These tools are designed for rough measuring and should not be used as exact measuring rules.

TOOLS & EQUIPMENT

RR112 COMPACT EXECUTIVE Telescoping handle on the suitcase size executive model makes it ultra-convenient. There's English, tenths, or metric models...all lightweight and ready for quick estimating jobs that don't require critical accuracy. 1 year warranty.

RR102 DUAL WHEEL EXECUTIVE Dual molded solid rubber tires give this model superior grip and stability on slick or rough surfaces. Counts rolling forward and subtracts in reverse. Curved telescoping handle. 2 year warranty.

RR318N & RR418 PROFESSIONAL LONG DISTANCE These husky Roadrunner long distance measuring wheels have all the professional features such as: Almost 2 mile measuring capability without resetting. Heavy duty polycast wheels with a clean 3-spoke design. Convenient kick stand keeps unit upright. Curved telescoping handle adjusts to comfortable height. Hang-up eyelet for convenient storage. 5 digit counter with reset button. 2 year warranty.
